Dear James,

I got the Vedanta DVD series from your site recently. I'm watching every day with great pleasure. This is the most beautiful thing I've ever encountered in my life. It ties together all aspects of life in a logical and intelligent way. I've never seen anything like it. All other spiritual and psychological stuff that I've heard and studied over the years seems hopelessly confused, immature and emotional compared to this. This is like a great cleansing from all stupid stuff that's been going on, the stupid emotional "selfless service" in AA that has almost killed me, the "Now" business of Eckhart and others, the beautiful but hopelessly unreachable "teachings" of Krishnamurti and the like.

Even my wife, who is not spiritually inclined in the usual sense, watched the part on *karma yoga* and she said, "This I can relate to, this is logical, not like the other stuff you used to torment me with." Ha, ha...

I feel a great great love for this. Thank you very much.
