

Actualization; The Enlightenment Bug Vaccine

Daniel Band

2016-05-26

Tom: Is it also true that after realization there is enlightenment sickness and that to cure it, actualization is necessary?

Daniel: Enlightenment sickness is a common bug. Yup, actualization is the vaccine!

Tom: The way i see it, realization is personal but actualization is universal.

Daniel: I like this statement very much.

Tom: Also true that there is no clear cut line between realization and actualization?

Daniel: Actualization is the direct, rock-solid, absolutely doubt-free confidence that 'I am awareness'. Actualization is when this knowledge is 'activated' 24/7 and renders *vasanas* non-binding as well as dissolves the sense of limitation and doer-ship. Only you know what side of the line your understanding is at.

Tom: By the way, I'm thinking to get an *Om* tattoo so i have the actualized 'stamp' on my skin, haha

Daniel: I'm covered in tattoos and can tell you that it ain't worth it!
