Seeker: Hi, James. Maybe you can't remember me, because we met in Tiruvannamalai in December 2011.

I followed your teachings and they slowly changed my paradigm, which I assumed as the true one. But a couple of months ago something new happened to me. The experience was catalyzed by the observation of what is happening on the planet, the huge wickedness, corruption, falsity, etc.

Some memories of my childhood in which dark shadows were watching me during the night, the Inorganic Beings of the Essene tradition, which I've followed for seven years, the Voladores of Castaneda, the loosh-eaters of Robert Monroe's tales... all these similar elements were unexplained up to yesterday.

More or less, every school, every path, says something about energetic parasites coming from another dimension and that they are responsible for what humankind is today.

Now, my questions are about how you and Vedanta putting these parasites in the cosmogony you are teaching. How is this fact, according with Vedanta, influencing awakening? How to manage it and how to become aware of it, not only through reading but through a direct experience?

Thank you for your attention and a hug, hoping to meet you again very soon.

James: I am not sure what you are talking about when you say "energetic parasites from another dimension." I teach Vedanta, which is a means of self-knowledge. There is no teaching about parasitic beings and I have no experience of it, so I am not qualified to comment. I wish you all the best.

~ Love, James
